**ORDER**

Application 23452B Permit 16140 License 10705

**ORDER APPROVING CHANGE IN PURPOSE OF USE  
AND AMENDING THE LICENSE**

**WHEREAS:**

1. License 10705, was issued to Harold R. Welch, Marjorie A. Welch, Robert E. Welch, and Miriam C. Welch on August 27, 1976, pursuant to Application 23452B.
2. License 10705 was recorded with the County Recorder of Siskiyou County on September 1, 1976 in Volume 762, on Pages 634, 635, and 636.
3. License 10705 was subsequently assigned to the Department of Fish and Game.
4. A Petition for Change has been filed with the State Water Resources Control Board (SWRCB).
5. The petitioned change would not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.
6. Compliance with California Environmental Quality Act Public Trust Consideration requires implementation of Wildlife Area Management Plan and protection of cultural resources.
7. Licensee has submitted the Shasta Valley Wildlife Area Management Plan.
8. The license condition regarding the SWRCB's continuing authority should be updated to conform to Title 23, CCR Section 780(a).

**NOW, THEREFORE, IT IS ORDERED THAT:**

1. The license condition regarding the purpose of use be amended to read:  
Irrigation and Wildlife Enhancement.

(0000003)

2. A condition be added to the license to read as follows:

Licensee shall implement the Shasta Valley Wildlife Area Management Plan as adopted June 30, 1992, by the Department of Fish and Game, including any amendments thereto. (0390500)

3. A condition be added to the license to read as follows:

Licensee shall construct and operate all wildlife enhancement facilities so as not to impact any of the known cultural resource locations within the Shasta Valley Wildlife Area (SVWA). All proposed water conveyance and impoundment facilities and project place of use (irrigated agriculture and wetland areas) shall be designed to avoid any disturbances to the known cultural resources. Any areas of proposed development that have not been subject to cultural resource survey shall have such survey work completed prior to the commencement of any construction activities. All mitigation/avoidance recommendations resulting from these cultural resource surveys shall be implemented prior to the initiation of construction activities. Previous cultural resource surveys completed within the SVWA shall be amended by completing documentation (i.e., formal site records) of all of those cultural resources identified that meet the minimal standards for site designation set by the State Office of Historic Preservation.

If any previously unrecorded cultural resources are discovered during the project activities, such activities shall cease within 100 ft. of the discovery until the State Water Resources Control Board, Division of Water Rights, has been notified and the find can be evaluated by a professional archeologist. Any mitigation measures deemed necessary shall be submitted to the Chief of the Division of Water Rights for review and approval. Approved mitigation measures shall be implemented prior to continuation of construction activities. (0380500)

4. The SWRCB's continuing authority condition be amended to read:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the SWRCB in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the SWRCB may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to:

(1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the SWRCB also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
